CUSTOM DESIGN AND MANUFACTURING

When it comes to custom manufacturing to your exacting specifications, let Gallery Specialty Hardware be your first choice. We will exceed your expectations utilizing our engineers, designers and product specialists. It's not unusual for custom manufacturers to take 12 to 16 months to complete a project, from start to finish. Most professionals in the hardware industry would agree this is often an insurmountable obstacle to the pursuit of custom solutions.

At Gallery Specialty Hardware we have the capabilities to deliver a custom project in 7 to 9 weeks. That's from concept, to end product which includes design, engineering, tooling, manufacturing and logistics. This entire process is achieved without sacrificing superb quality and craftsmanship at a fair price.
