

ALUMINUM CONTINUOUS GEARED HINGE

GSHHD112

- Aluminum alloy with self-lubricating bearings
- Can be used with any standard frame without hinge preps
- 83" length available in clear and dark bronze anodized
- Hinges are shorter than the door height to avoid threshold or carpet clearance problems
- Clearance required between the hinge edge of the door and the frame is 5/16" (7.9mm) minimum for square edge door. For beveled doors add 1/32" (0.8mm)
- For 1-3/4" doors. 48" maximum door width. Up to 200 pounds high frequency and 400 pounds for medium frequency doors.
- UL tested and approved for 90 minutes
